

Out of Stock - Item is not available at this time - Diesel fuel blend stock - Sulfur

Art. ID NIST-2771
Unit 1 bottle x 100 mL
Deliverydetails ADR Limited Quantity (LQ) / AIR Dangerous Good (DG) UN1202 III E2

Description

This Standard Reference Material (SRM®) is intended for use in the evaluation of methods, preparation of calibration mixes, and calibration of instruments used in the determination of total sulfur in diesel fuel oils or materials of a similar matrix. NIST-2771 is a commercial diesel fuel blend stock that was initially issued as Reference Material (RM) 8771 in 2005, with a reference value assigned for sulfur. With the incorporation of new data, the value has been upgraded to a certified value, and the material is now available as NIST-2771. A unit of NIST-2771 consists of an amber bottle containing approximately 100 mL of diesel fuel blend stock. Certified value /// Sample value(s) - please ask for current certificate.

Text/Information	Analyte/Parameter	CAS number	Concentration/Value	Unit	Method	Source
	Sulfur (S)	[7704-34-9]	0,102 ± 0,014	mg/kg
