

**Out of Stock - Item is not available at this time - Vickers Microhardness of Steel**

Art. ID	NIST-2829
Unit	1 block
Deliverydetails	No Dangerous Good /not restricted

Description

This Standard Reference Material (SRM®) is intended primarily for use in calibrating Vickers-type microhardness testers and is certified for mean Vickers hardness values at a load of 4.90 N (0.500 kgf). A unit of NIST-2829 consists of a steel block, approximately 3.2 cm in diameter and 1 cm in height. Five indentations were made within the inscribed square on the SRM's polished surface. Vickers hardness values are reported as Vickers hardness numbers (HV) in units of kgf/mm<sup>2</sup> and SI units of gigapascal (GPa). Each SRM® was individually measured and bears a serial number imprinted on the top surface. /// Sample value(s) - please ask for current certificate.
