Description

This Standard Reference Material (SRM®) is primarily intended for use in calibrating clinical procedures and devices for the determination of cardiac troponin I (cTnI) in human serum. It can also be used for value-assignment of calibrators and control materials. A unit of NIST-2921 consists of five vials, each containing approximately 115 µL of a dilute solution of human cardiac troponin complex. /// Sample value(s) - please ask for current certificate.
