

Sodium (Na) Standard Solution

Art. ID	NIST-3152a
Unit	50 mL
Deliverydetails	ADR Limited Quantity (LQ) / AIR Dangerous Good (DG) UN1760 II E2

Description

This Standard Reference Material (SRM) is intended for use as a primary calibration standard for the quantitative determination of sodium. One unit of NIST-3152a consists of 50 mL of an aqueous solution in a high-density polyethylene bottle sealed in an aluminized bag. The solution was prepared gravimetrically to contain a known mass fraction of sodium in nitric acid at a mass fraction of 5 %. /// Sample value(s) - please ask for current certificate.
