Art. ID NIST-3246
 Unit 5 X 3 g
 Deliverydetails No Dangerous Good /not restricted

Description

Standard Reference Material (SRM®) 3246 is intended primarily for use in validating analytical methods for the determination of flavonoids, terpene lactones, and toxic elements in Ginkgo biloba and similar matrices. This SRM can also be used for quality assurance when assigning values to in-house control materials. NIST-3246 is part of a suite of ginkgo dietary supplement SRMs that have been developed to cover a range of natural matrices and analyte levels. A unit of NIST-3246 consists of five bottles, each containing approximately 3 g of ground leaves. /// Sample value(s) - please ask for current certificate.
