

2-Acetoxy-1,4-naphthoquinone

Art. ID TRC-A167658-250MG
Unit 250 mg
Deliverydetails De Minimis

Description

Application Note: 2-Acetoxy-1,4-naphthoquinone is an intermediate in the synthesis of Acequinocyl-d25 (A130602). Isotope labelled Acequinocyl is an inhibitor of mitochondrial electron transport in complex III and used to control phytophagous mites. Used in Pesticide detection.
