

5-[2-(Acetyloxy)ethyl]-3-[(4-amino-2-methyl-5-pyrimidinyl)methyl]-4-methyl-2(3H)-thiazolethione

Art. ID TRC-A187135-100MG
Unit 100 mg
Deliverydetails De Minimis

Description

Application Note: 5-[2-(Acetyloxy)ethyl]-3-[(4-amino-2-methyl-5-pyrimidinyl)methyl]-4-methyl-2(3H)-thiazolethione is an intermediate in synthesizing Thiothiamine (T375250), an impurity of Thiamine (T344185). Thiothiamine inhibits the activity of glutamate decarboxylase and decreases the concentration of GABA in brain tissue. Thiamine Impurity A.
