

Acrolein (stabilized with Hydroquinone)

Art. ID TRC-A191200-1G
Unit 1 g
Deliverydetails ADR Dangerous Good (DG) / AIR Forbidden UN1092 3 I E0

Description

Application Note: Acrolein is formed through the catalytic oxidation of propylene over gold (1) in the synthesis of acrylic acid. Potential contributor to asthma sensitivity (2). Drinking water contaminant candidate list 3 (CCL 3) compound as per United States Environmental Protection Agency (EPA), environmental, and food contaminants.
