Description

Application Note: 2-Amino-4-[4-(phenylmethyl)phenyl]-3-thiophenecarboxylic Acid Ethyl Ester is an intermediate in synthesizing Barbadin (B118250), a selective beta-arrestin/beta2-adaptin inhibitor. It selectively inhibits the interaction between b-arrestin and the b2-adaptin subunit of the clathrin adaptor protein AP2 without affecting the formation of receptor/b-arrestin complexes.
