

(4-Azidophenyl)methanol

Art. ID TRC-A856360-250MG
Unit 250 mg
Deliverydetails De Minimis

Description

Application Note: (4-Azidophenyl)methanol is an intermediate in synthesizing 4-Azidobenzaldehyde (A822040), which is used in the synthesis of fullerenes, and photocrosslinkable chitosans.
