

DL-2-aminobutyric Acid-D5

Art. ID TRC-A614322-100MG
Unit 100 mg
Deliverydetails De Minimis

Description

Application Note: DL-2-aminobutyric Acid-D5 is an intermediate used in the synthesis of Methyl Ergonovine-d5 Maleate Salt (M304602), which is a labeled metabolite of Methysergide. Semisynthetic ergot alkaloid. Oxytocic.
