

N-[4-[(4-Aminophenyl)sulfonyl]phenyl]formamide

Art. ID TRC-A626895-100MG

Unit 100 mg

Description

Application Note: N-[4-[(4-Aminophenyl)sulfonyl]phenyl]formamide is a dihydropteroate synthetase inhibitor. Also, it is a derivative of the parent compound, Dapsone (D193250), which is an antibacterial used in the treatment of dermatitis herpetiformis.
