

Ampicillin Desoxyazetidin-2-one (Mixture of Diastereomers) (~90%)

Art. ID TRC-A634348-50MG
Unit 50 mg
Deliverydetails De Minimis

Description

Application Note: Ampicillin Desoxyazetidin-2-one can be used to develop HPLC methods that detect compounds or impurities related to ampicillin in bulk drug. Ampicillin Desoxyazetidin-2-one is a related compound of Ampicillin (A634300), a beta-lactam antibiotic used for treating bacterial infection. Ampicillin interferes with cell wall synthesis in bacteria.
