

Ampicillin Amino-benzeneacetaldehyde

Art. ID TRC-A634375-100MG
Unit 100 mg
Deliverydetails De Minimis

Description

Application Note: Ampicillin Amino-benzeneacetaldehyde can be used to develop HPLC methods that detect compounds or impurities related to ampicillin in bulk drug. Ampicillin Amino-benzeneacetaldehyde is a related compound of Ampicillin (A634300), a beta-lactam antibiotic used for treating bacterial infection. Ampicillin interferes with cell wall synthesis in bacteria.
