

Azido-peg8-nhs Ester

Art. ID TRC-A965580-100MG
Unit 100 mg
Deliverydetails De Minimis

Description

Application Note: Azido-PEG8-NHS ester series of products contain an azide function on one end of a single molecular weight dPEG® spacer and a reactive group on the other end of the spacer. The dPEG® spacer is hydrophilic and non-immunogenic and improves the water solubility of the target molecule while reducing the immunogenicity and increasing the hydrodynamic volume of the target.
