

## **(2E)-3-[4-(Acetyloxy)-3-methoxyphenyl]-2-propenoyl Chloride**

Art. ID TRC-A167515-100MG

Unit 100 mg

Deliverydetails De Minimis

### Description

Application Note: (2E)-3-[4-(Acetyloxy)-3-methoxyphenyl]-2-propenoyl Chloride is used in the synthesis of target compound of Feruloyl Arabinofuranoside, Also, it is an intermediate used in the synthesis of 3-O-(E)-Feruloylquinic Acid (F308980), which is a phenolic acid with potential antioxidant and antifungal activities. Secondary metabolite in the coffee brewing process.
