

## **4-Amino-1H-indazole-5-carboxylic Acid**

Art. ID	TRC-A613350-100MG
Unit	100 mg
Deliverydetails	De Minimis

### Description

Application Note: 4-Amino-1H-indazole-5-carboxylic Acid is an indazole derived heterocyclic building block. It is an analogue of 1H-Indazole-5-carboxylic Acid (I509048), which is used in the synthesis of azabicyclic aryl amide derivatives as alpha7 nicotinic acetylcholine receptor agonists.
