

## **2-[[[(2-Amino-5-chlorophenyl)(2-fluorophenyl)methylene]amino]-ethanol**

Art. ID TRC-A617653-25MG  
Unit 25 mg  
Deliverydetails De Minimis

### Description

Application Note: 2-[[[(2-Amino-5-chlorophenyl)(2-fluorophenyl)methylene]amino]-ethanol is an intermediate in the synthesis of Ethyl Loflazepate (E679525). Ethyl Loflazepate is a new benzodiazepine derivative as a new anti-anxiety drug. Ethyl Loflazepate and its metabolite were compared with those of Diazepam (D416855), Nitrazepam (N490140) and Lorazepam (L469850). The anti-conflict effect of Ethyl Loflazepate was slightly more potent than that of Diazepam and much more potent than that of Lorazepam.
