

## **6-(6-Aminohexanamido)-hexanoic Acid Methyl Ester Hydrochloride**

|                 |   |
|-----------------|---|
| Art. ID         | TRC-A618848-5G  |
| Unit            | 5 g   |
| Deliverydetails | ADR Excepted Quantity (EQ) / AIR Excepted Quantity (EQ) |

### Description

Application Note: 6-(6-Aminohexanamido)-hexanoic Acid Methyl Ester Hydrochloride is an intermediate in the synthesis of 6-(6-(6-Aminohexanamido)hexanamido)hexanoic Acid (A618823). 6-(6-(6-Aminohexanamido)hexanamido)hexanoic Acid is used in the making of a preconjugate which serves as immunoreactive conjugate useful as a developer antigen in a competitive inhibition immunoassay for the polymorphic analyte. Also used in the efficient synthesis of a heterobifunctional coupling agent.
