

Infrared High Reflectance Specular Standard (Nominal Diameter 25 mm)

Art. ID	NIST-1929
Unit	disc
Deliverydetails	No Dangerous Good /not restricted

Description

This Standard Reference Material (SRM) is intended primarily for calibrating the reflectance scales of specular reflectometers in the infrared (IR) spectral region from 1.0 μm to 18.0 μm (555 cm^{-1} to 10,000 cm^{-1}). A unit of NIST-1929 consists of a specular finish gold plated copper disk, approximately 3.0 mm thick and 25.3 mm in diameter.
