

Mercury in Iodized Activated Carbon

Art. ID NIST-2445
Unit 25 g
Deliverydetails No Dangerous Good /not restricted

Description

This Standard Reference Material (SRM) is intended for use in the evaluation of chemical methods of analysis for mercury in halogenated activated carbon sorbents. /// Sample value(s) - please ask for current certificate.

Text/Information	Analyte/Parameter	CAS number	Concentration/Value	Unit	Method	Source
	Mercury (Hg)	[7439-97-6]	0,743 ± 0,020	mg/kg
