Description

This Reference Material (RM) is a solution of perfluorinated carboxylic acids (PFCAs) and perfluorooctane sulfonamide (PFOSA) in methanol intended primarily for use in the calibration of chromatographic instrumentation. A unit of NIST-RM 8446 consists of four 2 mL ampoules, each containing approximately 1,2 mL of solution. Two of the ampoules contain PFCAs in Methanol, and the other two ampoules contain PFCAs and PFOSA in Methanol. Reference values: /// Sample value(s) - please ask for current certificate.
