

Out of Stock - Item is not available at this time - SLAP-Water Light Stable Isotopic Standard

Art. ID	NIST-8537
Unit	20 mL
Deliverydetails	No Dangerous Good /not restricted

Description

NIST-RM-8537: SLAP - Standard Light Antarctic Precipitation (Water) ($\delta^{2}\text{H}$ VSMOW, $\delta^{18}\text{O}$ VSMOW). This Reference Material (RM) is intended to provide water samples of known isotopic composition concerning $2\text{H}/1\text{H}$ and $18\text{O}/16\text{O}$ isotope ratios and should be used to calibrate/check internal laboratory standards. Each RM unit consists of 20 mL water in a sealed glass ampoule. Since only very limited quantities of these materials exist, the distribution is limited to one unit of each per three-year period of time.
