Description

This Standard Reference Material (SRM®) is intended for use in preparing solutions for calibrating electrodes for pH measuring systems. NIST-189c Potassium Tetroxalate Dihydrate,  $\text{KH}_3(\text{C}_2\text{O}_4)_2 \cdot 2\text{H}_2\text{O}$ , was prepared to ensure high purity and uniformity. However, this SRM® is certified only as a pH standard, pH(S), not as a pure substance. A unit of NIST-189c consists of 65 g of potassium tetroxalate dihydrate. A solution of molality 0.05 mol/kg is recommended for the calibration of pH measuring systems /// Sample value(s) - please ask for current certificate.
