Description

This Standard Reference Material (SRM®) is intended for use in preparing solutions for calibrating electrodes for pH measuring systems. NIST-191d consists of two components, each prepared to ensure high purity and uniformity: Sodium Bicarbonate, NaHCO3 (191d-I), and Sodium Carbonate, Na2CO3 (191d-II). However, neither SRM® component is certified for purity of substance. A unit of NIST-191d consists of 25 g of sodium bicarbonate (191d-I) and 30 g of sodium carbonate (191d-II), each contained in its respective clear glass bottle. A solution of molality 0.025 mol/kg with respect to both NaHCO3 and Na2CO3 is recommended for the calibration of pH measuring systems. /// Sample value(s) - please ask for current certificate.
