

APY29 Hydrochloride Salt

Art. ID TRC-A735422-50MG
Unit 50 mg
Deliverydetails to be checked

Description

Application Note: APY29 Hydrochloride Salt is an hydrochloride salt of APY29 (A735420), which is a modulator of inositol requiring enzyme IRE1alpha, a protein sited in the endoplasmic recticulum that has kinase and RNase activities triggered by endoplasmic recticulum stress. It also functions in the allosteric control of IRE1alpha endoribonuclease using kinase inhibitors for the development of drugs for endoplasmic recticulum stress related diseases.
