Description

This Standard Reference Material (SRM®) is intended primarily for evaluating chemical and instrumental methods of analysis of zinc-base die-casting alloys. NIST-629 is one of a series of reference materials (SRMs 625 through 630) for this purpose. A unit of NIST-629 consists of a bar segment approximately 44 mm square and 19 mm thick. The metallurgical condition is that resulting from a continuous chill casting process. Certified values /// Sample value(s) - please ask for current certificate.
