

5-Aza-(3',5'-Di-O-p-toluoyl)-2'-deoxyuridine (alpha Isomer)

Art. ID	TRC-A797135-100MG
Unit	100 mg
Deliverydetails	to be checked

Description

Application Note: 5-Aza-(3',5'-Di-O-p-toluoyl)-2'-deoxyuridine (alpha Isomer) is an intermediate used in the synthesis of 5-Aza-2'-deoxyuridine (alpha/beta mixture) (A797120), which is a metabolite of 5-aza-2'-deoxycytidine (A796950), a cancer treatment, in particular to inhibit the growth of pancreatic endocrine tumor cell lines.
