

## **4-Amino-D2 Benzoic Acid Monosodium Salt**

Art. ID	TRC-A591526-25MG
Unit	25 mg
Deliverydetails	to be checked

### Description

Application Note: 4-Amino-D2 Benzoic Acid Monosodium Salt is an intermediate in the synthesis of DMABA-d4 NHS Ester (D678402), which is a labelled DMABA NHS ester (D678400). DMABA NHS ester is a reagent that reacts with the primary amine group of PE lipids. DMABA NHS ester has been used in combination with DMABA NHS ester-d4, -d6, and -d10 to study relative changes in PE lipid abundance before and after radical oxidation.
