

Bioassay Design, Development and Validation (2 day) (Live Webcast)

Art. ID	USP-BIO-1030-03
Unit	Each
Deliverydetails	No Dangerous Good

Description

This two-day bioassay course will focus on factors to be considered in the design, development and validation of bioassays. The course introduces related USP general chapters, terminology, bioassay life cycle, important statistical tools and best practices, followed by a detailed discussion on the topics of design and development, robustness, validation and post-validation, with examples of USP pharmacopeial bioassays. The course reflects statistical tools in USP General Chapters <111>, <1030>, <1032>, <1033> and <1034>. (Event Webex_TrainingCntr 16 hours)
