GMP Compliance in Quality Operations for Dietary Supplements (On-Demand)

Art. ID USP-DS-GMP-02

Unit Each

Deliverydetails No Dangerous Good

Description

This course will focus on key aspects and approaches for QC operations to comply with the dietary supplement GMP requirements, and on the use and benefits of USP monographs, test procedures, Reference Standards, and general guidance chapters to help meet GMP compliance. The course will also cover GMP compliance for QC laboratory operations, covering a broad range of topics, including specifications for components and finished products, analytical instrument qualification and calibration, validation and verification of test procedures, and internal and third-party laboratory audits. The live version of this webcast took place on June 2, 2016. (Webcast 6 hours 11 minutes)
