

USP Excipients Workshop: Assessing Excipients' Impact on Drug Absorption by Physiologically-based Pharmacokinetic Modeling (On-Demand)

Art. ID	USP-EXC-WS-10
Unit	Each
Deliverydetails	No Dangerous Good

Description

Physiologically based pharmacokinetic modeling may assess an excipient's effect on drug absorption for hypothesis testing and risk assessment related to an excipient's impact on bioavailability.
Permeability is a sensitive parameter. However, the magnitude of the effect can be specific to the transporter involved, API and dose (Webcast 35 minutes)
