

**USP Excipients Workshop: Impact of Excipients on Topical Drug Formulation  
Microstructure and Performance (On-Demand)**

Art. ID	USP-EXC-WS-12
Unit	Each
Deliverydetails	No Dangerous Good

Description

Selection of excipients (Q1) and the quantity of each excipient (Q2) determines the nature of the heterogeneous, multiphasic microstructure (Q3) of the topical semisolid composition. The Q3 plays a critical role in driving performance. (Webcast 29 minutes)
