<u>USP Excipients Workshop: Role and Influence of Excipients in Orally Inhaled Drug Products (On-Demand)</u>

Art. ID USP-EXC-WS-14

Unit Each

Deliverydetails No Dangerous Good

Description

Orally inhaled products contain formulation excipients, the effects of which on quality, performance, safety and efficacy must be considered. Only a few excipients are employed in orally inhaled drug products, but their properties are critical to the quality and performance of these dosage forms. (Webcast 35 minutes)
