

Dissolution/Drug Release tests of Drug Products Applied to the Skin (On-Demand)

Art. ID	USP-CM-724-02
Unit	Each
Deliverydetails	No Dangerous Good

Description

This webinar will discuss USP General Chapters <724> and <1724> and will present the equipment, most common conditions, and challenges for the evaluation of the in vitro performance tests of drug products applied to the skin. Dosage forms that can be applied to the skin include ointments, pastes, creams, lotions, gels, foams, and transdermal systems. As some of these semisolid dosage forms can also be applied in the eye, a brief discussion on ophthalmic products will also be included.
