

Use of Enzymes in the Dissolution Testing of Gelatin Capsules (On-Demand)

Art. ID	USP-CM-711-06
Unit	Each
Deliverydetails	No Dangerous Good

Description

This webinar discusses the procedure to be used in the dissolution testing of gelatin capsules when they fail the two-tier dissolution test. The webinar will include discussion of crosslinking in gelatin, its causes and prevention, quality requirements of the enzymes to be used and the procedure to determine their activity, and alternative procedures when the dissolution medium contains surfactants. A report on the activities related to the revision of this procedure in USP General Chapter <711> Dissolution will be presented.
