

Impurities in Drug Products and Drug Substances - A USP Approach (Classroom)

Art. ID	USP-CM-231-01-1
Unit	Each
Deliverydetails	No Dangerous Good

Description

"USP Education is pleased to offer its enhanced course, "Impurities in Drug Substances and Drug Products-A USP Approach". This course integrates ICH Guidance for impurities, relevant USP General Chapters, and current industry practices. It also provides insights and practical examples on how to evaluate and manage impurities in drug substances and drug products, and addresses the evaluation of contaminants, adulterants, foreign substances and impurities in drug substances and drug products, and packaging-related extractables and leachables. This course will cover USP-NF General Chapters <232>, <233>, <466>, <467> and <1086> and include case studies for impurities in the development and revision of USP monographs."
