Description

The USP Certificate of Pharmacopeial Quality Assessment?Spectroscopy Track offers the U.S. pharmaceutical Industry a comprehensive online program that highlights the knowledge and skills the quality assessment professional should have in order to comply with U.S. regulatory standards and the knowledge and skills required to be aligned with Good Manufacturing Practices. Designed and taught by the experts who help establish relevant USP-NF standards, the USP certificate program has three tracks each with eight courses. The courses in this program were carefully selected by USP scientists to provide a long lasting theoretical foundation and feature practical applications so you can have an immediate impact on your job and take your career to the next level. Certificate participants will have six months from the date of purchase to complete the program.
