

Container Closure Integrity Evaluation of Sterile Drug Products (Classroom)

Art. ID	USP-CM-1207-01
Unit	Each
Deliverydetails	No Dangerous Good

Description

This course discusses the USP <1207> series of general chapters, which will focus on theoretical and practical aspects of various Container Closure Integrity (CCI) testing technologies in the overall context of sterility assurance and provides a systematic approach to applying these testing methods for CCI verification throughout drug product lifecycle.
