

Practical Applications of Chapter 467 Residual Solvents (Classroom)

Art. ID	USP-CM-467-02
Unit	Each
Deliverydetails	No Dangerous Good

Description

Significant revisions to standards for residual solvents found in USP/NF General Chapter <467> became official on July 1, 2008. These changes continue to impact the industry. In this one day course, both compendial and regulatory aspects will be covered. Additionally, different options and control strategies for implementation of analytical procedures A, B and C will be discussed. Other related topics including Validation <1225>, Verification <1226> and system suitability requirement and adjustment based on <621> will be highlighted. Furthermore, the most recent PF revision proposal and comparison of USP and EP procedures for residual solvent determination will briefly be reviewed.
