Compendial HPLC Practices (1 day) (Classroom)

Art. ID USP-CM-621-02-02

Unit Each

Deliverydetails No Dangerous Good

Description

This course teaches the USP General Chapter <621> with the focus on system suitability parameters, and adjustments allowed to the chromatographic system. Additional course topics are basis of HPLC theory, column selection and practice. Update on harmonization efforts and elements on validation and verification of compendial procedures will be also discussed.
