

USP Excipients Workshop: Why do We Call Excipients in Topical Products "Inactive Ingredients?" (On-Demand)

Art. ID	USP-EXC-WS-11
Unit	Each
Deliverydetails	No Dangerous Good

Description

"This presentation discussed the complex functionality of "inactive" ingredients in topical semisolid drug products, and elucidated how topical excipients exert their influence by modulating the physicochemical and microstructural arrangement of matter in the dosage form. (Webcast 27 minutes)"
