

Standard Cigarette for Ignition Resistance Testing

Art. ID	NIST-1196a
Unit	2 cartons(400 cigarettes)
Deliverydetails	No Dangerous Good /not restricted

Description

This Standard Reference Material (SRM) is intended for use by laboratories to test the cigarette ignition resistance of soft furnishings and their components, and thermal insulation for resistance to cigarette ignition in accordance with 16 CFR 1632, California Technical Bulletin 117-2013, and 16 CFR 1209. A unit of NIST-1196a consists of two cartons of cigarettes containing 10 packs of 20 cigarettes each. /// Sample value(s) - please ask for current certificate.
