<u>Powder Diffraction Line Profile Standard for Crystallite Size Analysis (Nano-Crystalline ZnO Powder)</u>

Art. ID NIST-1979

Unit 2 x 3 g

Deliverydetails No Dangerous Good /not restricted

Description

This Standard Reference Material (SRM) is intended for use in the analysis of crystallite size through the degree of profile broadening in a powder diffraction experiment. A unit of SRM 1979 consists of two samples of zinc oxide powder, the first with a median crystallite size of approximately 15 nm and a second with a median of approximately 60 nm. These samples are referred to hereafter as the ?15 nm crystallites? and ?60 nm crystallites? respectively. Each sample contains approximately 3 g of powder bottled in an argon atmosphere.
