

Bilirubin

Art. ID	NIST-916b
Unit	100 mg
Deliverydetails	Dry ice shipment /not restricted

Description

This Standard Reference Material (SRM) is intended for use in the calibration and standardization of measurement procedures for the determination of bilirubin in clinical samples, and for assignment of bilirubin quantity values to in-house control materials. This SRM comprises neat unconjugated bilirubin that is certified as a chemical substance of known purity. A unit of SRM 916b consists of 100 mg of bilirubin. /// Sample value(s) - please ask for current certificate.
