

Common Commercial Asbestos: Chrysotile

Art. ID	NIST-8044
Unit	2.6 g
Deliverydetails	ADR Excepted Quantity (EQ) / AIR Cargo Air Only (CAO) UN2590 III E0 (IATA) E1 (ADR)

Description

This reference material (RM) is intended for harmonizing optical microscopy methods used in the identification of chrysotile asbestos in bulk materials, specifically manufactured building materials. A unit of RM 8044 consists of one bottle of loosely packed mine-grade chrysotile asbestos. Each bottle contains approximately 2.6 g of material.
