| Unit | 2.6 g |
| Deliverydetails | ADR Excepted Quantity (EQ) / AIR Cargo Air Only (CAO) UN2590 III E0 (IATA) E1 (ADR) |

Description

This reference material (RM) is intended for harmonizing optical microscopy methods used in the identification of chrysotile asbestos in bulk materials, specifically manufactured building materials. A unit of RM 8044 consists of one bottle of loosely packed mine-grade chrysotile asbestos. Each bottle contains approximately 2.6 g of material.
