## **Soy Protein Concentrate**

Art. ID NIST-8187 Unit 5 x 10 g

Deliverydetails No Dangerous Good /not restricted

## Description

This Reference Material (RM) is intended primarily for evaluation of methods for determining isoflavones in soy protein concentrates and in similar matrices. This RM can also be used for quality assurance when assigning values to in-house reference materials. A unit of RM 8187 consists of 5 packets, each packet containing approximately 10 g of powder. The development of RM 8187 was a collaboration between the National Institute of Standards and Technology (NIST) and the National Institutes of Health, Office of Dietary Supplements (NIH-ODS). Due to the lack of measurement capability at NIST to maintain the certified mass fractions values of isoflavones, SRM 3237 no longer meets international quality standards (ISO 17034) for serving as a certified reference material. However, the material continues to meet ISO 17034 standards as a reference material and is thus being offered as RM 8187. /// Sample value(s) - please ask for current report of investigation.

Text/Information	Analyte/Parameter	CAS number	Concentration/Value	Unit	Method	Source
Non-Certified Mass Frac	Daidzin	[552-66-9]	$7,79 \pm 0,34$	mg/kg		
tion Value (Dry-Mass Ba						
sis)						
Non-Certified Mass Frac	Genistin	[529-59-9]	12,3 ± 2,1	mg/kg		
tion Value (Dry-Mass Ba						
sis)						
Non-Certified Mass Frac	Glycitin	[40246-10-4]	$0.81 \pm 0.14$	mg/kg		
tion Value (Dry-Mass Ba						
sis)						
Non-Certified Mass Frac	Total Protein		$70.3 \pm 0.3$	%		
tion Value (Dry-Mass Ba						
sis)
