

NVP-AAM077 Tetrasodium Hydrate - CAS 459836-30-7 - Calbiochem

Art. ID SAF-5045280001
Unit EA
Deliverydetails No Dangerous Good /not restricted

Description

A potent antagonist for NMDA receptors. Modestly higher selectivity for the NR2A than for the NR2B containing NMDA receptors (IC₅₀ = 0.015 and 0.078 µM) but insufficient to discriminate between NR2A and NR2B-containing NMDA receptors. Widely used for researches in synaptic plastic, learning and memory, and epilepsy.
