

DNQX Disodium Salt - CAS 2379-57-9 - Calbiochem

Art. ID SAF-5050260001
Unit EA
Deliverydetails No Dangerous Good /not restricted

Description

A potent competitive antagonist selective for AMPA/kainate glutamate receptors ($IC_{50} = 0.19-1.66 \mu M$ and $0.35 \mu M$ for AMPA and GluK2 receptors, respectively). Routinely used as a tool to distinguish the role of neurotransmissions mediated by AMPA/kainate and NMDA receptors in studying brain functions and disorders.
